

Who we are

The Applied Innovation Centre is a research-based organisation that provides a range of innovation-related services through a team of reflective practitioners dedicated to the study and practice of innovation within organisations.

What we do

We assist individuals, teams and organisations to become more innovative and manage continuous challenges and change.

We provide results through innovation.

More specifically, we assist our clients to:

- Identify their blind spots
- Clarify issues, challenges and problems
- Generate novel ideas and solutions
- Select and develop suitable ideas and solutions
- Plan, implement and evaluate actions

How we do it (Services provided)

Using a unique methodology we provide the following services:

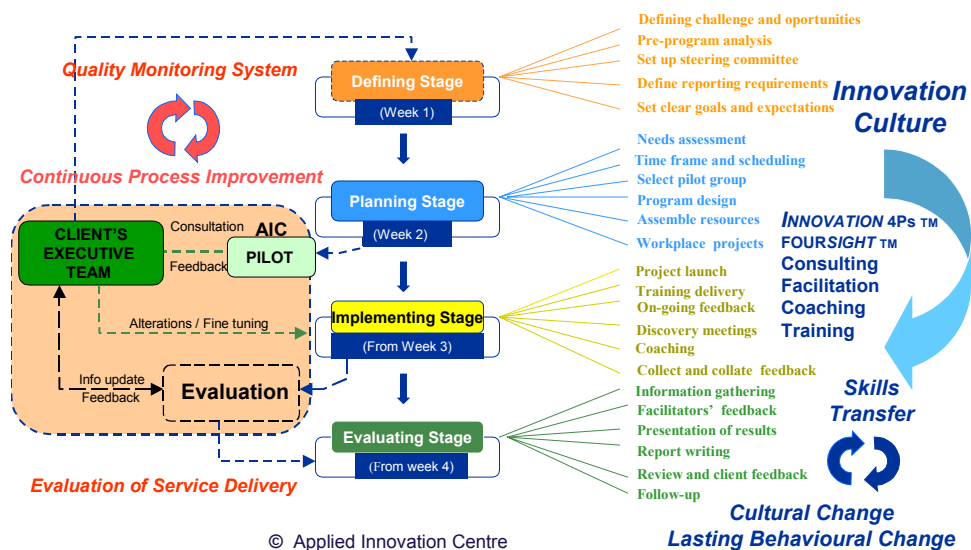

- Innovation-related research (local and international)
- Consulting
- Leadership Development
- Facilitation
- Coaching (individual and team coaching)
- Team Building
- Management Education & Training

Why should you contact us?

The benefits of using our services include:

- Becoming more innovative will enable your organisation to achieve its business objectives and become a leader in its field.
- You and your team will develop the skills and strategies to become better problem-solvers and decision-makers.
- You and your people will become more flexible and confident in handling all types of challenges and changes.
