2 Days: CUA Ref # 818445

Course Overview

Leadership is a hard to define quality that requires attitudinal competence and strong people and organisational skills. Effective leaders know how productive teams operate and are able to help teams and organisations to work from the same page and achieve the overall 'vision'.

Leading and Managing Teams is an interactive program that explores leadership styles, leadership attitudes, the nature of effective teams and the ways in which teams can be led to achieve outstanding outcomes.

Participants will identify their own leadership strengths and styles and personally explore and practice skills to improve their effectiveness.

Recommended For

Leaders, managers, supervisors, co-ordinators, or anyone who relies on the performance of others for achievement of their own outcomes and success.

Benefits

For the organisation

- Managers who can lead their teams professionally;
- Better understanding between managers and team members;
- More effective team work; and
- An organisation where strong leadership is an accepted norm.

For individuals

- Confidence to provide leadership to your team;
- A clear understanding of one's leadership style; and
- Higher performing teams and individuals who report to you.

Learning Outcomes

By the end of the two day program participants will have:	
• Analysed their personal leadership style;	• Examined techniques for developing people;
• Understood the roles of team leader and team member;	• Investigated ways of managing conflict;
• Experienced the effects of team dynamics;	• Prepared to monitor their team's performance;
• Related team empowerment to their own workplace;	• Made plans to monitor one aspect of leadership and one aspect of management for improving their team; and
• Conducted a team problem solving simulation;	• Developed a plan to improve individual and team performance that includes specific strategies, time frames and evaluation.
• Planned team communication strategies;	

Training Methodology

This is a highly interactive and practical program in which participants will:	
<ul style="list-style-type: none"> Determine and analyse their own leadership style. 	<ul style="list-style-type: none"> Apply the learning to a work-related problem in the form of a plan.
<ul style="list-style-type: none"> Participate in discussions and team-work with ever changing groups. 	<ul style="list-style-type: none"> Present their plans and received feedback.
<ul style="list-style-type: none"> Detail and share a personal work-related issue. 	<ul style="list-style-type: none"> Record their learning.
